

New from Vauhti!

From one and the same bottle: Anti-icing + Glide + Grip !

ANTI-ICE DF DOUBLE FUNCTION

It cannot get any easier!!!

ANTI-ICE DF

- For Nanogrip, Optigrip and other no-wax skis
- For recreational skier's waxable classic skis
- For off-track skis
- For children's classic skis

EASY TO APPLY, DRIES FAST, APPLY FROM TIP TO TAIL

- Prevents no-wax skis from icing
- Improves no-wax skis glide in all conditions
- Improves grip in -1C and colder conditions
- All-purpose wax for recreational classic skis in -1C and colder conditions - wax from tip to tail

APPLICATION

- Apply an even layer of Anti-Ice DF from tip to tail. Let dry minimum 3-4 minutes. If you want more grip, apply another layer onto grip zone of the skis (ca. 1 m area in the middle).
- Let the skis cool outside for a few minutes before skiing.
NOTE: If you take the skis from a warm room or the car, they have to cool down outside before the wax starts gripping.
- You can also apply Anti-Ice DF outside. Apply it on the grip zone of the skis (ca. 1 metre area in the middle of the base).
Let dry ca. 3-4 minutes. If you apply Anti-Ice DF on the whole ski base let it dry 6-10 minutes.
- When the air temperature is *0C or warmer* , remove Anti-Ice DF from *no-wax* skis using regular *Vauhti Wax Remover* .
